

# Unmistakably Ovation

*These are just a few things that make Ovation distinctive from other cabinet manufacturers.*

All Wood Construction	Ovation's cabinet is an all-wood box; including 3/4" full depth adjustable plywood shelves, 1/2" plywood sides, plywood tops, bottoms, <i>and</i> a natural Maple veneer interior.	
Optimal Corner™	A unique feature of Ovation's cabinetry is the optional "Optimal Corner" which employs a flush miter joint that eliminates the side view of the face frame for a truly custom furniture look.	
Drawer Construction	Second to none in appearance and strength, Ovation's 4-5/8" high drawer boxes are made from 5/8" solid Maple hardwood with dovetailed corners and 1/2" plywood bottoms. Tandem Plus glides, with the integrated Blumotion™ are standard on Ovation drawers. Blumotion™ adapts to different weights and closing forces to give a smooth, silent close every time.	
Standard Sizes	Ovation's distinctive 13" wall cabinet depth maximizes storage space within your kitchen.	
Adaptable Look	Ovation has a more refined look with 1-1/4" vertical stiles on all cabinets which allows for wider openings. Custom sizes and unique design shows flexibility and a true indication of what Ovation is all about. The Blumotion™ closing system is now standard on all Ovation doors.	
Rollout Shelf System	The most unique rollout shelf system using Tandem Plus undermount full extension glides with complete adjustability and the integrated Blumotion™...superior to any other rollout shelf system in the industry.	
Patina Pre-stain	Ovation takes great care in its finishing process. It uses a specially developed toner called a "patina pre-stain" that helps achieve more color consistency and depth in the overall finish. The patina pre-stain also works to soften some of the color hues that develop in woods with age.	
Unlimited Colors	Ovation has a variety of standard finishes along with Custom Color capabilities. Your dreams become reality through unlimited selection.	
Attention to Detail	The combination of more than 128 door styles and specialty woods like alder, rustic cherry and quartersawn oak, plus the attention to detail, redefines the word... <i>value</i> .
