

Amenity
by OVATION

Amenity Construction

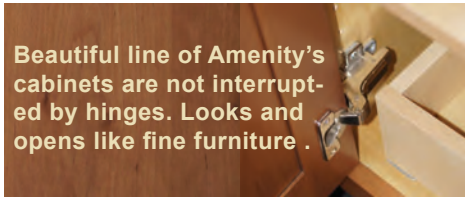

Smooth operation with maximum width and depth for storage. Feel and see the difference!

DRAWER BOXES are 5/8-inch and dovetailed, with an integrated plywood bottom. Undermounted full-extension soundless close slides are standard.

Full-width, quality rollouts give you a lifetime of use. High sides keep contents contained.

ROLLOUTS are built with the same attention as drawers. No cutting corners; Undermounted full-extension, soundless close slides are standard.

Beautiful line of Amenity's cabinets are not interrupted by hinges. Looks and opens like fine furniture.

CONCEALED HINGES are only visible when doors are open and do not interfere with the lines of the cabinetry as shown in the above picture. If you prefer, for inset styling, Amenity offers a ball hinge available in 4 finishes: sterling nickel, satin nickel, oil rubbed bronze, and wrought iron.

Fit, form and finish as good as any in the field

CABINETS are constructed of all plywood with 1/2-inch tops bottoms and side panels. Back panel is 1/4-inch with integrated 1/2-inch hanging rail. • **FINISHED ENDS** are matching veneer plants for an almost-flush finished end. • **TOE KICK** is 4 1/2-inches tall.

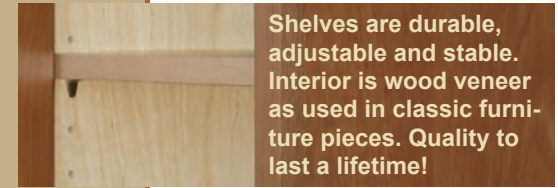

Wall Cabinets

WALL CABINET DEPTH is a full 13-inches deep for an amazing 8 percent more storage area.

Storage of everyday items is made easy and efficient.

Have larger serving dishes? No problem!

Bigger items normally limited to base cabinets can be store right at eye level.

Shelves are durable, adjustable and stable. Interior is wood veneer as used in classic furniture pieces. Quality to last a lifetime!

SHELVES are 3/4-inch, full-depth, UV coated hardwood on stainless steel shelf pins. **INTERIOR** is UV coated hardwood veneer.

Wood contracts or expands depending on moisture content of surrounding air. Full range of movement allows easy adjustment to compensate.

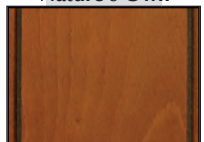

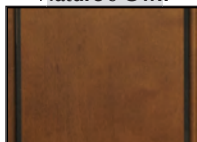

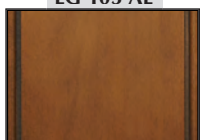

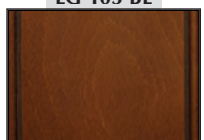

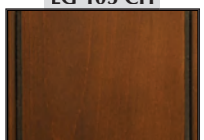

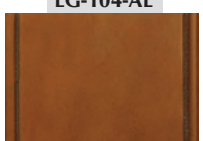

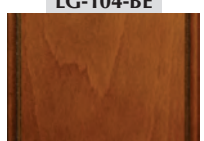

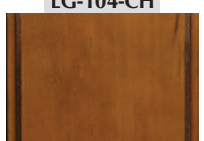

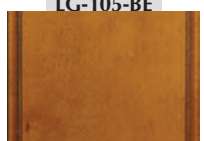

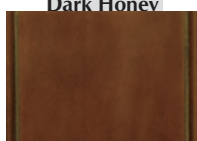

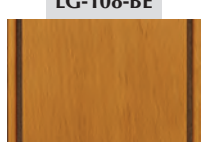

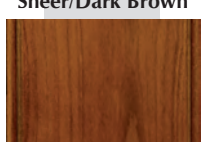

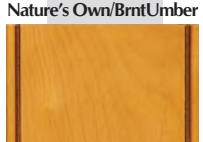

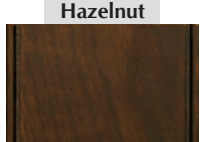

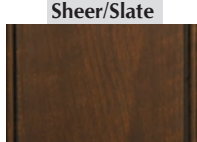

OVERLAY HINGES are adjustable 6-ways: in, out, up, down, and side-to-side.

Amenity Character

Amenity has ONE style of distressing. Done by hand and not machine, it is designed to imitate natural wear and tear and may include one or more of the following: nicks, cuts, cracking, rasping, nail holes, and worm holes. Each piece of your kitchen will be as unique as the Artisan who created it.

OVATION CABINETS

... always rave reviews

Formula for Quality

First-class materials

Wood and other composites of the highest grade possible is **imperative**.

Precision equipment

Superior machines guarantee exactness of cut giving you the best possible joinery.

Surface Preparation

Detailed attention to sanding and other treatments prepares the surface for the finish.

Clean Finish

Application of the best finishes on all components ensures that the beauty of the material comes through.

All are key ingredients, but without the true craftsmanship in each department, Ovation's standards would not be met.
